

RECYCLING AND WASTE SERVICES FOR BUILDINGS BY DESIGN

As an architect, planner or developer, you can confidently specify a Green Gorilla recycling and waste management solution knowing that over 170 years combined experience goes into creating every high quality and dependable plan.

You can draw on expertise that spans across the building industry; including new developments, project alterations and renovations, as well as individual or multi-site operations.

Partnerships with Green Gorilla are based on finding the most environmentally and efficient way to manage and process waste. In fact we are so committed to diverting waste from landfill that we own our own 2.7ha Waste Processing Facility that results in some 3.5 million kg of waste diverted from Auckland landfill each month.

Passionate advocates and a Platinum Sponsor of Homestar v4. The independent tool that rates and communicates the sustainability and performance of New Zealand homes, including multi-unit dwellings.
